(per ARS 48-910.A.1. Domestic water and domestic wastewater improvement districts; authority to set fees; liens; foreclosure) User Fees that are proportionate shares of the cost of operation, maintenance and replacement of a water delivery system, a water disposal system or a wastewater treatment and disposal system or any combination of those systems, including a system for the treatment and use of effluent, and may include the cost of administrators, surveyors, sanitation experts, engineers, legal counsel and other persons as are reasonably necessary for the operation, maintenance and replacement of the systems. The fees may also include any contractual amounts required to meet covenants relating to bonds or other obligations of the district secured by a pledge of, or promise to pay from, the district's fees.
